nickmorrison.me | github.com/FutureProg

Innovative problem-solver with a comprehensive skill set spanning data science, software development, business and design, dedicated to enhancing productivity and quality of life. Outside of work, I am committed to community-based initiatives, including founding Safe Streets Halton with the goal of ending traffic related deaths and injuries in the Halton Region.

Work Experience

Intermediate Data Scientist

Digital Extremes, London, ON (Remote)

Jul 2022 – Nov 2023

- Increased team productivity by proactively identifying, documenting, and fixing weaknesses in structures, data, and processes.
- Improved key gameplay features by providing business cases and analysis via ReDash, Python, PostgreSQL, and Jupyter Notebooks.
- Demonstrated ingenuity and leadership by developing a machine learning model to refine organizational understanding of player preferences using Scikit-Learn.
- Provided key insights through the development of dashboards for revenues and product user experience metrics via ReDash and PostgreSQL.
- Improved analytic capabilities through the development and maintenance of ETL data pipelines via Python, PostgreSQL, and MongoDB on a Linux server.

Data Scientist

Geotab Inc., Oakville, ON

Sept 2019 – May 2022

- Lead a cross-functional agile team in developing a revenue-generating product, from prototype to market via NodeJS, and SQL.
- Spearheaded internal process improvements and operational standardization, resulting in increased team productivity.
- Facilitated informed business decisions by effectively communicating analytics to stakeholders via ReDash, Google BigQuery, Python, and Jupyter Notebooks.
- Successfully gathered requirements from stakeholders of diverse backgrounds and delivered work products accordingly.
- Managed and developed ETL data pipelines via Python, Google BigQuery, and Apache Airflow.

Course Developer

Durham College, Oshawa, ON (Remote)

Jan 2020 – Apr 2020

- Created lessons and comprehensive lesson plans introducing students to artificial intelligence in a business context.

Software Developer

Konrad Group, Toronto, ON

May 2018 – Aug 2019

- Diagnosed and resolved software architecture issues, significantly improving app performance.
- Collaborated with designers to find optimal solutions to UI and UX design challenges.

Education

Master of Management and Artificial Intelligence (MMAI), Queen's University

Aug 2019

B.A.Sc. in Business Informatics Co-op (Computer Science and Business), McMaster University

Apr 2018

Projects

Road Safety Analysis

- Processed and analyzed municipal open-source data to evaluate road safety using physical characteristics and crash data.
- Technologies Used: Jupyter Notebook, Python, GIS, Tensorflow, Scikit Learn, Git, Keras.

Miway Transit Analysis

- Analyzed municipal open-source data to identify areas effectively served by Mississauga Transit.
- Technologies Used: Jupyter Notebook, Python, Git.

Flappy Bird RL

- Applied knowledge of reinforcement learning in a Flappy Bird clone.
- Technologies Used: Python, OpenAI Gym, Pygame, Git.

Volunteering

Founder

Safe Streets Halton

March 2022 – Present

- Founded an organization dedicated to ending traffic related deaths and injuries in Halton Region.
- Increased municipal investments through research and persuasive presentations to city council.
- Raised awareness and recruited volunteers through events, publications, and city council presentations.

Voting Citizen Member & Chair

Burlington Integrated Transportation Advisory Committee

Feb 2021 – Dec 2023

- Contributed insights and recommendations to aid the city in meeting transportation goals.
- Effectively chaired committee meetings from Jan 2022 to Dec 2022.

Instructor & Teaching Assistant

Canada Learning Code

July 2019 – Dec 2019

- Effectively communicated programming and machine learning fundamentals to students of various ages and backgrounds.
